

AQMETRICS

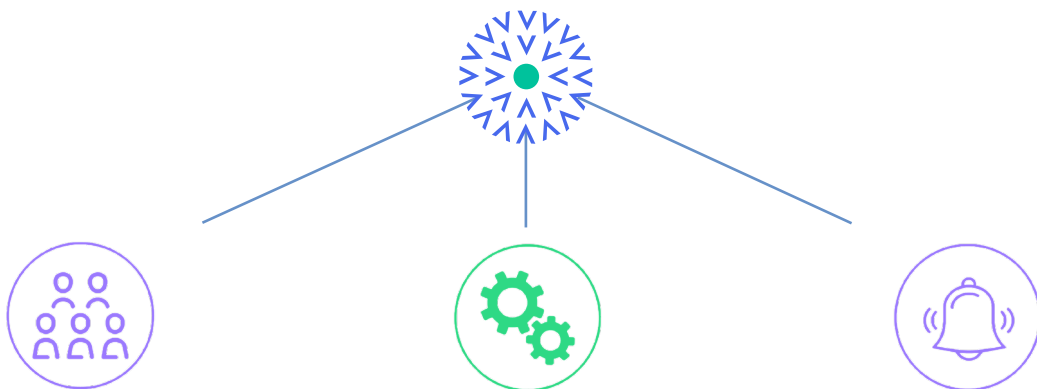

Approved Reporting Mechanism (ARM)

Simplify your MiFID II Reporting

- **Take control of your data management.** Achieve always accurate, always available data.
- **Integrate with your front, middle and back office.** Gain a cross-firm view of compliance.
- **Uncover any errors and omissions early.** Meet the deadlines without manual bottlenecks.
- **Embed reporting in your business.** Tailor the workflow to automate the compliance process.
- **Reconcile with ease.** Gain assurance on timeliness, accuracy and completeness.

The AQMetrics Difference

Trusted by investment managers globally

Embedded Knowledge

With deep domain expertise in AQMetrics, your firm gains access to industry experts.

Platform Flexibility

With intelligent platform integration flexibility, you can take control of the reporting process.

Continuous Compliance

With multi-jurisdictional reporting, your firm can access new markets efficiently and seamlessly.

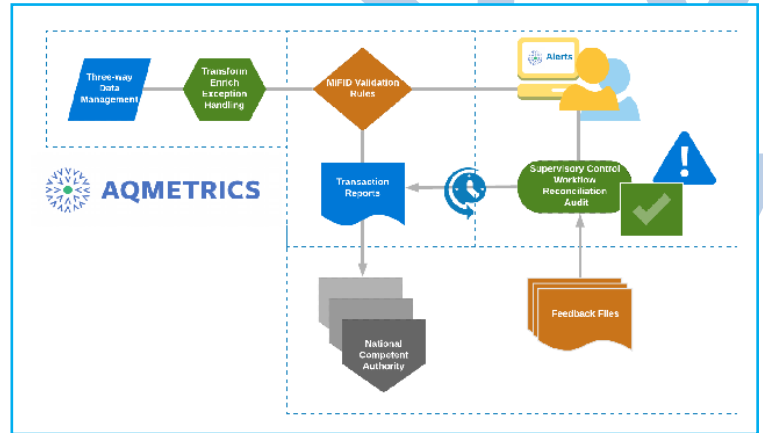

AQMETRICS

A transaction reporting solution for firms of all sizes

At AQMetrics, data management is at the heart of the platform. We focus on providing functionality that ensures data integrity and allows your firm to create reliable, seamless reporting with data insights.

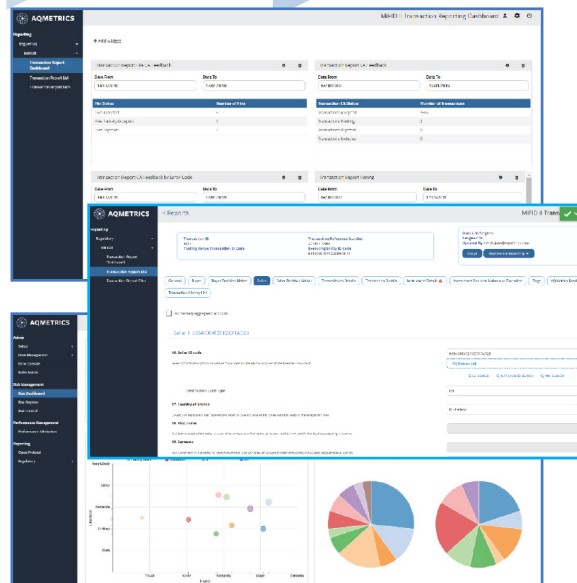

You can self-manage data, in the most efficient way for your business. We provide the controls that support early detection of problems, so that your firm can focus on timely compliance and core business operations.

AQMetrics multi-layered approach to data management is unique in market, with automated data feeds, user-initiated batch imports and in-application data maintenance for always available, always accurate data.
